EDUCATION

Bachelor of Science in Computer Science | Minor in Project Management

[Texas A&M University](#)

- GPA: 3.74

Expected Graduation: May 2027

- Dean's Honor Roll (Fall 2024), Distinguished Student (Spring 2025, Fall 2025, Spring 2026)

Relevant Coursework: Data Structures & Algorithms, Linear Algebra, Principles of Statistics, Software Engineering, Computer Systems, Public Speaking, Database Systems, Robotics and Spatial Intelligence

WORK EXPERIENCE

Product Management Intern – [Blackhawk Network](#)

June 2026 – Present

- Conducted **15+ stakeholder interviews** across product, engineering, and operations teams to map end-to-end onboarding workflows and surface friction points.
- Synthesized research and operational data into **10+ prioritized pain points**, building a roadmap and Opportunity Solution Tree to structure findings and guide solution direction.
- Authored a **PRD** for the top-priority solution area and am developing prototype mockups, validating concepts directly with stakeholders to refine **MVP scope**.
- Presented discovery insights and recommendations to senior leadership, including multiple **VPs of Product Management**, to align on the most valuable problems to solve.

Undergraduate Teaching Assistant – [College of Engineering, Texas A&M University](#)

Aug 2025 – Present

- Supporting **100+ students** by diagnosing coding challenges and streamlining feedback processes, improving comprehension of algorithms and programming concepts.

Software Intern – [Robotic Perception, Agriculture AI startup](#)

June 2025 – Aug 2025

- Led an end-to-end **dataset pipeline project**, managing a team of 3 to deliver 1,500+ annotated images for ML model training.
- Built an optimized Python-based annotation pipeline that **cut preprocessing time ~40%**, partnering with engineers and PMs to align training data with product requirements.

Water Safety Instructor & Lifeguard

Aug 2021 – Present

[Carpenter Recreation Center, Plano, TX & Texas A&M Rec Center](#)

- Delivering structured swim programs for **500+ students** while designing Canva marketing campaigns that **boosted enrollment ~20%**.
- Implementing process and safety protocol improvements, enhancing reliability for **100+ daily patrons**.

PROJECTS

Zylo Healthcare Scheduling Platform – Product Ideathon – emily6g.github.io/Zylo

March 2026

- Built a functional healthcare scheduling prototype in a **12-hour ideathon**, designing conflict detection, waitlist management, and no-show prediction to reduce hospital delays from fragmented coordination.
- Developed the working dashboard using **Claude Code (JavaScript, HTML, CSS, JSX)**, balancing information density with usability for healthcare coordinators.

Amazon Rufus AI Redesign – Product Management Club (Honorable Mention) – [View Prototype](#)

Jan – Apr 2026

- Led a semester-long research project identifying low feature visibility and decision fatigue as the core barriers to Rufus AI adoption.
- Designed an end-to-end **Figma** prototype with guided onboarding and contextual prompts that turn conversations into product shortlists and cart-ready outcomes.

LEADERSHIP

President/Treasurer — [Chabad Jewish Student Organization](#)

Dec 2023 – Present

- Lead a 200+ member organization, overseeing strategic planning, budgeting, operations, event logistics, and vendor partnerships.

SKILLS

Product & Design: Product Management, MVP Scoping, Feature Prioritization, Stakeholder Communication & Alignment, User Research, UI/UX Design, Prototyping, Agile/Iterative Development

Technical: Python, Java, C++, JavaScript, HTML, CSS, SQL, Machine Learning Fundamentals, Generative AI

Tools: Figma, Git, Canva, Google/Microsoft Office Suite

Languages: English (fluent), Hebrew, Russian (conversational)
